

Friday, 19 November 2008

Dear Client,

We would like to take this opportunity to introduce Future Metals Recycling and advise you that as of Wednesday 19 November, Future Metals Recycling will be taking over National Metals Recycling. We would like to thank Geoff Munday and all his staff for the seamless transition to the new operation and wish Geoff all the best for his future.

Future Metals Recycling wish to extend a warm welcome to you as a new client and to let you know it is business as usual. We will be in contact in the coming few weeks to keep you informed regarding the transition. National Metals Recycling Hallam yard will remain open for business until advised otherwise.

Future Metals Recycling commenced operation in Shepparton in 2002 and since then has developed a strong brand in the metal recycling industry. In March of 2008 Future Metals began operations in Melbourne and on the 6 October opened a purpose built metal recycling facility in Ordish Rd Dandenong South. This new facility has state of the art equipment, computerised weigh bridge, one way traffic flow, concrete ferrous yard and undercover drop off area for non-ferrous material.

Our fleet of trucks currently service the metropolitan and south eastern regional area of Melbourne, with the acquisition of National Metals Recycling this will increase to over 1000 bins in the metropolitan area.

As a valued new client, you will see in Future Metals Recycling a professional organisation with an outstanding service orientated focus. Our pick-up service will continue to operate either on an as required basis or by prescribed pick-up, depending on the needs of your organisation. To organise pick-up or to speak to one of our representatives please call us on:

**1300 17 27 27 - (1300 1 SCRAP)**

Once again Future Metals Recycling welcomes you as a valued client and we look forward to a strong association into the future.

Yours Sincerely

Tyrone Landsman  
Managing Director
